Que es la interoperabilidad?

Construir el "EHR" nacional con la comunidad internacional

Marso 2018 - **https://goo.gl/v6fNom**

Hola a todos!

About Me

James Agnew

15 years in healthcare implementations,
open source, and technology.

Today: 80% Startup Life,
20% University Hospital Life.

What is a “National EHR”?

Document Exchange System

- Supports Referrals and Transfer of Care

Personal Health Record

- Consumer access and involvement in healthcare

Capacity Planning / Monitoring

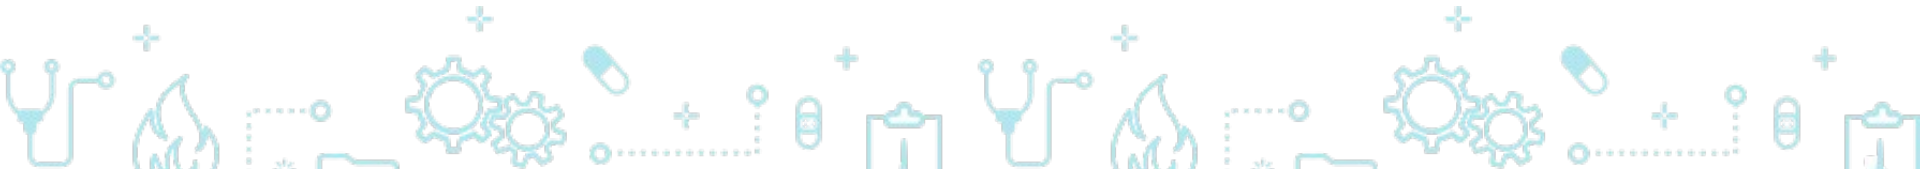
- Disease Surveillance
- System planning

Condition Management

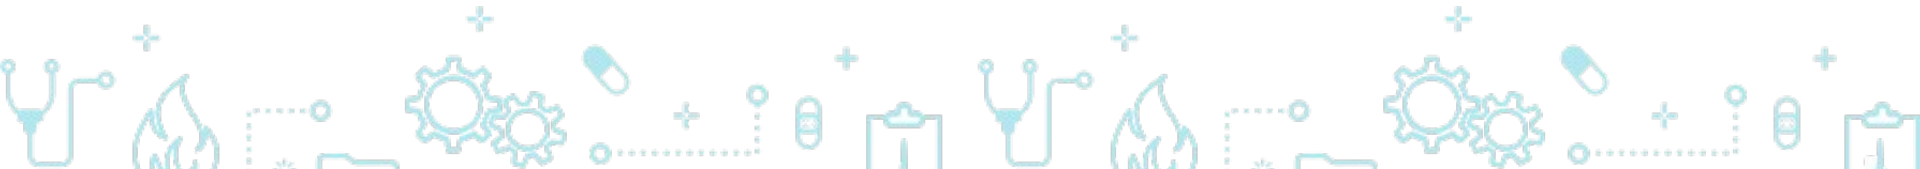
- Improved outcomes for priority conditions (Diabetes, TB, HIV)

Don't Worry

No countries have a complete national EHR (yet)

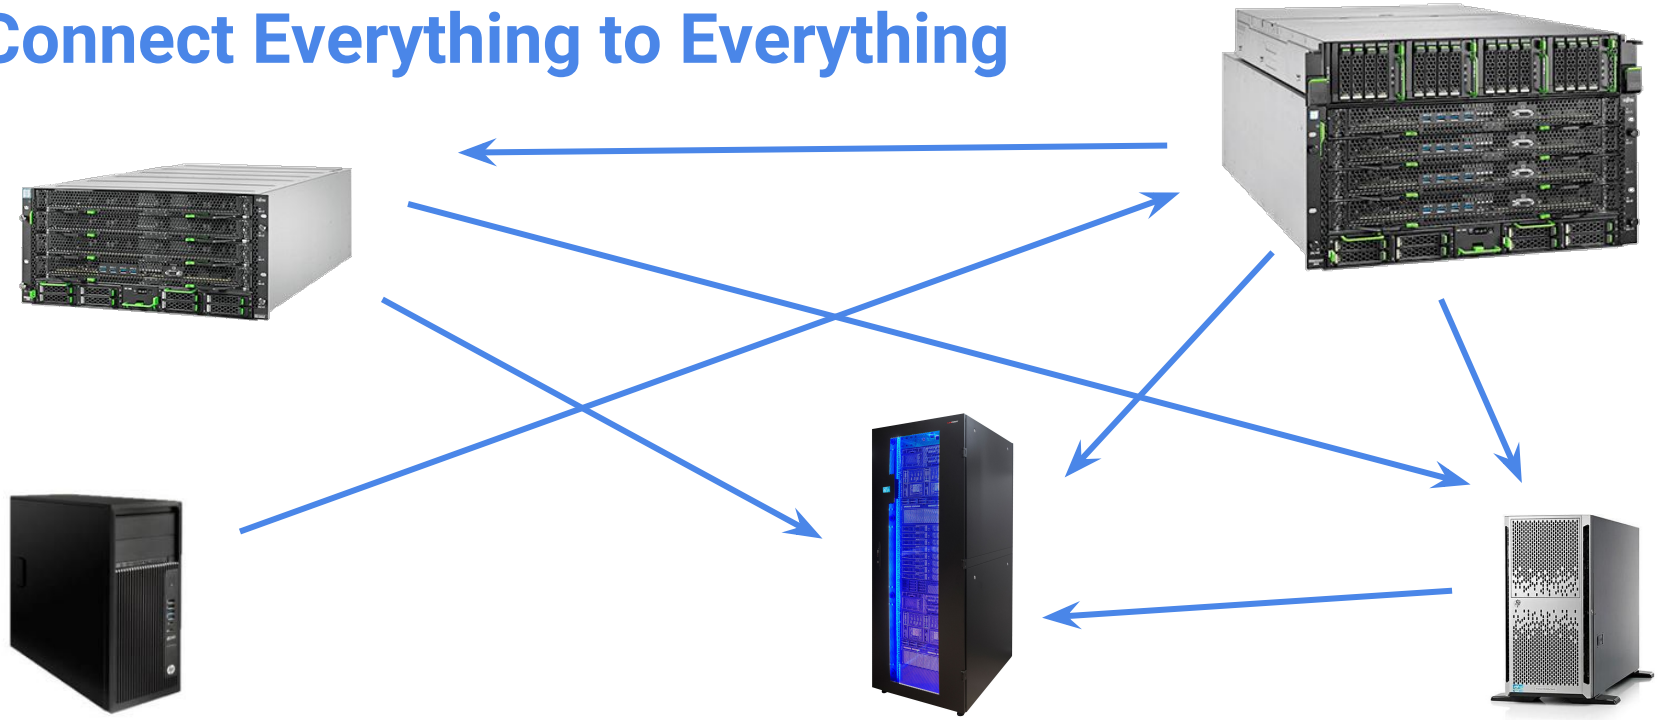


Interoperability is a work in progress...



What Have We Tried?

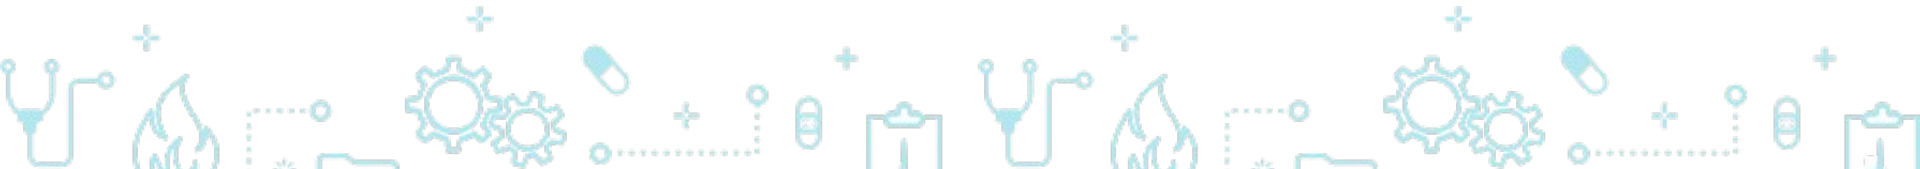
Connect Everything to Everything



What Have We Tried?

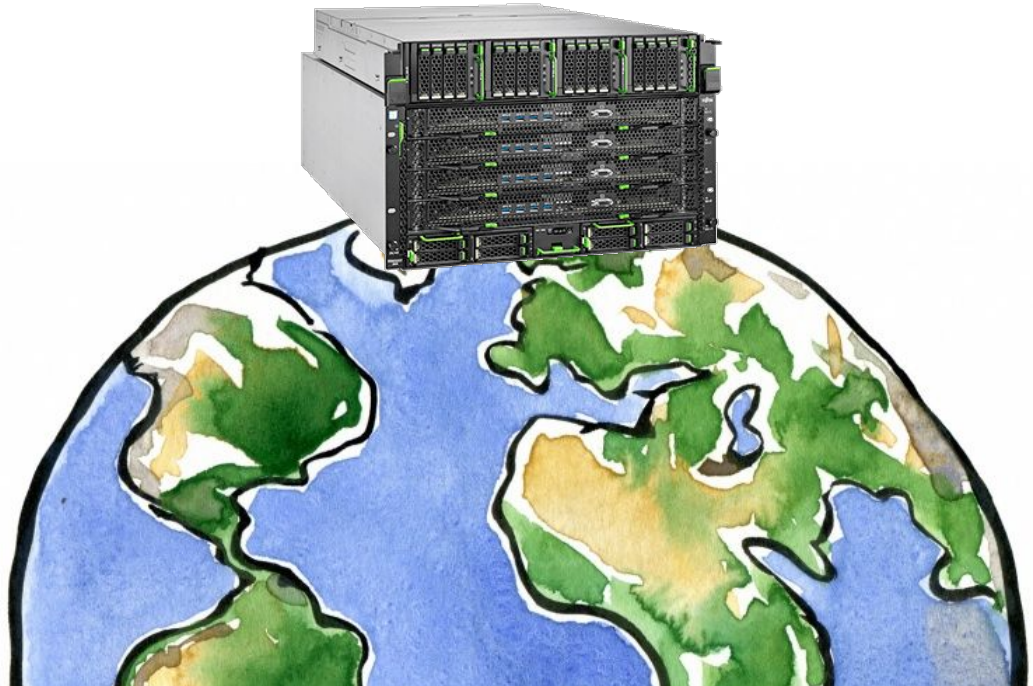
Connect Everything to Everything

This works… and gets more and more complicated over time.



What Have We Tried?

Buy Everything from One Vendor



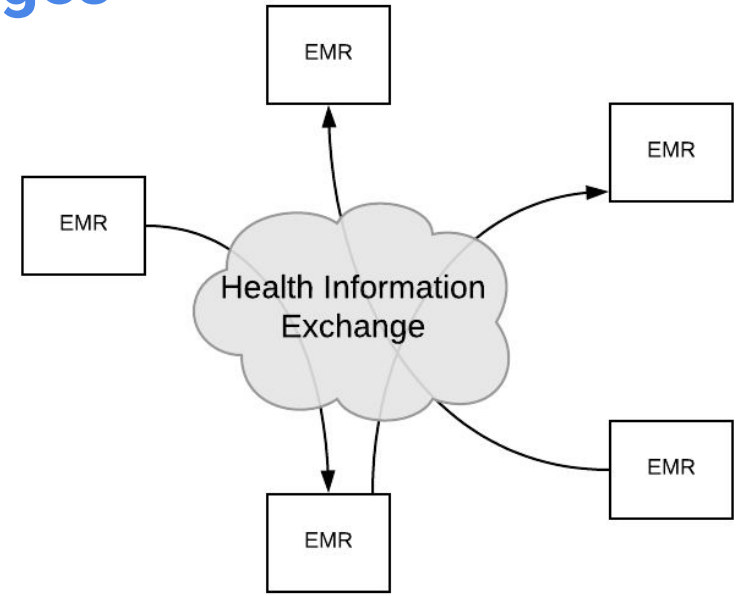
What Have We Tried?

Buy Everything from One Vendor

This works… until you want something that your vendor doesn’t do

What Have We Tried?

Health Information Exchanges



What Have We Tried?

Health Information Exchanges

This works… but you have replaced the fax machine with a more convenient fax machine

What Have We Tried?

Government Mandates

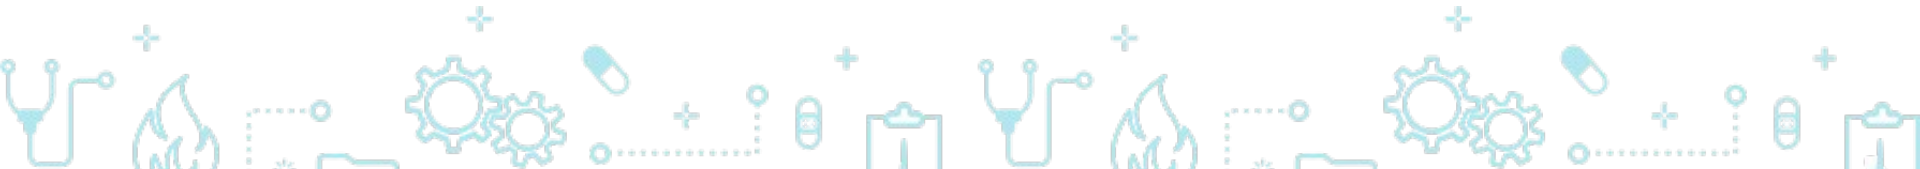
What Have We Tried?

Government Mandates

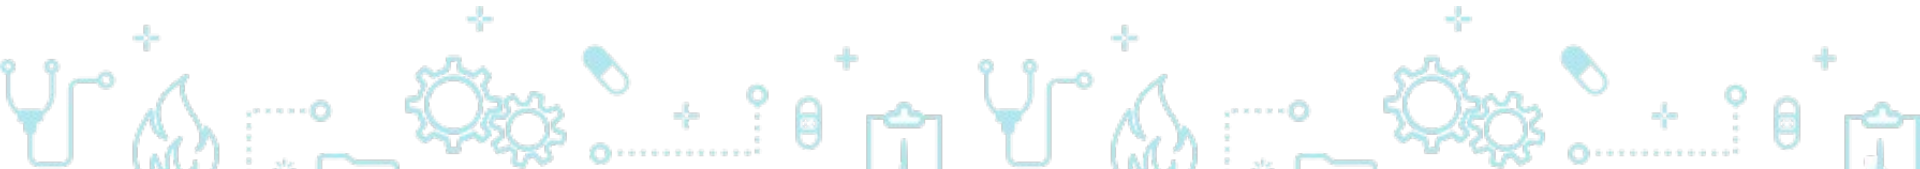
Government can create the conditions for success

Government cannot mandate success

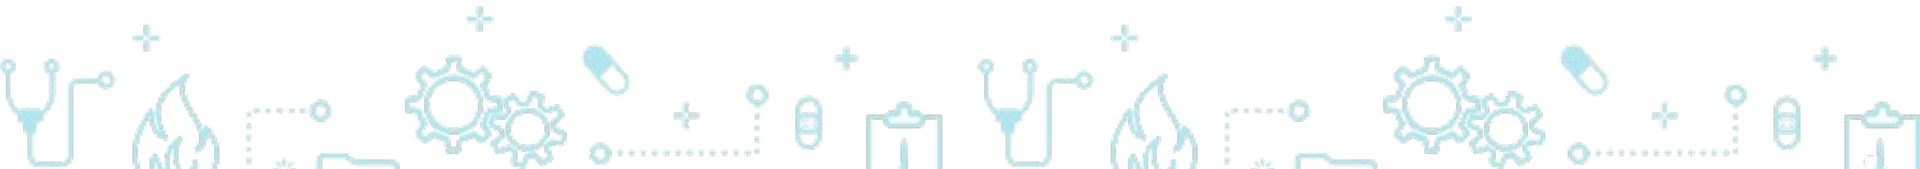
What are we trying now?



FHIR



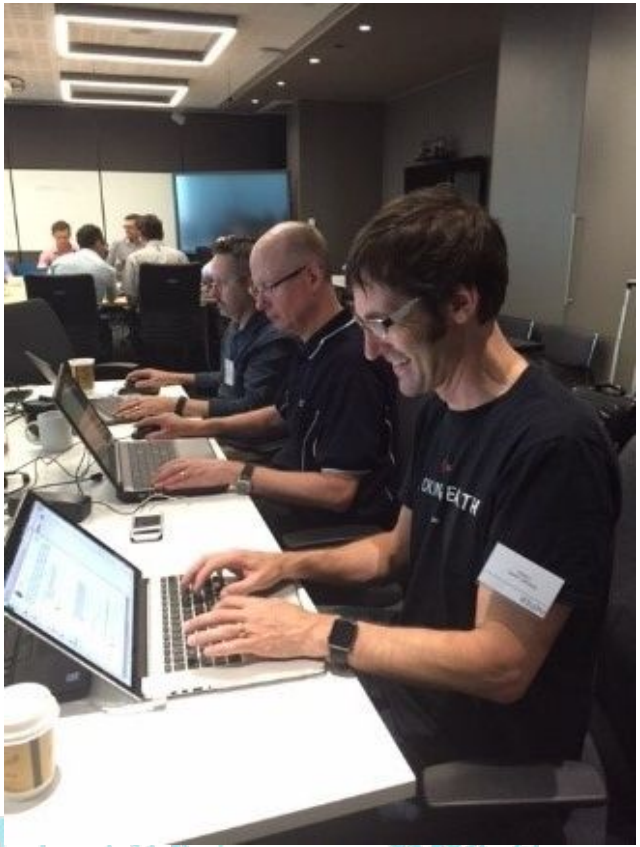
FHIR = Community.



USA

Amsterdam

Australia



Hanoi
